VOL. 19 #: 2 | 2015

Theme: Food & Beverage Services

We started getting the ingredients from the week before, and we did all the cooking the morning of the party. We made the cheesecake the night before.

That sounds great to me, because I love cooking and just serving people. Where can I go to learn more about this?

Well my Mom did the Food and Beverage services programme at HEART. They teach you everything, from how many waiters you need for every 10 persons, to how many persons can be served from a gallon juice.

Those are the things that I'd want to learn.

Yeah it's more than just cooking. They're basically teaching you how to run your own restaurant. That's what my parents would like to do soon.

They should! It sounds like they're great at it.

They are!

Hey, let's see where else offers training in Food and Beverage services. We can make a list of the names and ask our Home Economics teacher about them.

Good idea. Let's get started.
